

## Best of Show Entrants/Finalists

sources regardless of hardware or IT infrastructure. [www.io-informatics.com](http://www.io-informatics.com)

• **Isilon IQ with OneFS 5.0** is the first and only storage system to scale to greater than 3.4 Petabytes of capacity and up to 30 Gigabytes per second of aggregate performance from a single file system and single volume achieving more than 200X the scalability and 60X the performance of traditional SAN and NAS storage systems. [www.isilon.com](http://www.isilon.com)

**NextBio** provides a life sciences search engine and discovery platform, which enables researchers and clinicians to better access, understand, and share data. NextBio indexes and correlates highly complex experiments, literature, and clinical trials to enable discovery. [www.nextbio.com](http://www.nextbio.com)

• **Ocarina Networks' ECOsystem** includes the Optimizer, which compresses data and files, and the Reader, software that integrates with file servers to decompress the files. The system uses a "context-aware" approach that optimizes compression based on patterns within the data. [www.ocarinanetworks.com](http://www.ocarinanetworks.com)

**ParaScale** is a software-only solution that can be downloaded from the web and applied to any Linux platform. ParaScale enables hundreds of commodity servers to be clustered together to act as a file repository with massive capacity and parallel throughput. [www.parascale.com](http://www.parascale.com)

**PBS GridWorks' Personal PBS** uses the same technology as PBS Professional to make real-time, on-the-fly adjustments based on processor and memory availability. It allows users to work on their desktops while submitted jobs run in the background. [www.openpbs.org](http://www.openpbs.org)

• **Phase Forward's Clarix Interactive Response Technology** is a next generation

• Best of Show Finalist

interactive voice/Web response system that operates on a single, unified platform for telephone and Web. The platform provides system robustness and improved risk management to support global clinical trials. [www.phaseforward.com](http://www.phaseforward.com)

**PleaseReview** makes the process of collaborative review and authoring less painful and more efficient within a department, across an enterprise, inside or outside of firewalls. [www.pleasetech.com](http://www.pleasetech.com)

**Plectix' Cellucitate** is a new computational approach to cell signaling that provides scientists with a collaborative, web-based workspace for simulating cell signaling networks and exploring their causal and dynamic properties. [www.plectix.com](http://www.plectix.com)

**QUOSA Literature Workflow Solution** provides a complete literature access environment for the enterprise including archiving and metadata, supporting both those managing and vetting literature resources on behalf of others and end users. [www.quosa.com](http://www.quosa.com)

**Selvita's Protein Modeling Platform** is a web-based modeling tool, built on the idea that protein modeling can be more user-friendly and practical. The platform features superior protein structure prediction at all the difficulty

levels based on CASP top competitors technology. [www.selvita.com](http://www.selvita.com)

• **Sophic's Cancer Biomarker Knowledge Network** has converged the NCI Cancer Gene Index, release three of the Biomax BioXM Knowledge Management environment, and the Cancer Biomarker Knowledge Network. The database is NCI-funded and open source. [www.sophicalliance.com](http://www.sophicalliance.com)

**Trilink Biotechnologies** has released **CleanAmp dNTPs**, the newest addition to Trilink's line of PCR-enhancing products. CleanAmp products offer a complete chemical solution to Hot Start activation through primers and dNTPs to control mis-priming and primer dimmer formation. [www.trilinkbiotech.com](http://www.trilinkbiotech.com)

**Valliance's TRUcompare** is the only commercially available automated testing tool for data and content migration. The testing process uses configurable source to target data transformation to enable 100% testing, reducing time and cost. [www.valliancepartners.com](http://www.valliancepartners.com)

**Xyntek's ITX-cGene Assay Data Analyzer & Regression Curve Generator** is highly customizable Java and Oracle-based application for regression-curve fitting and analysis on dose-response data maintained in a highly scalable database. [www.xyntekinc.com](http://www.xyntekinc.com)
